30 YEARS AIM Mould System

Axxicon started to deliver the quick change AIM Mould System in 1989 and has in 30 years successfully delivered worldwide more than 2500 mould bases and over 12.000 inserts and mirror plates.

Our worldwide based customers are the biggest raw material suppliers, compounders, additive producers, test institutes, universities and OEM companies like machine builders, automotive, toy producers etc.

Why do customers choose for Axxicon?

- Axxicon has in-house engineering, knowledge about standards like ISO, ASTM
- Axxicon has a high sophisticated facility with high quality / accurate machines, high skilled / experienced employees with extensive experience in mould making
- Axxicon offers also Installation & Training, spare parts, maintenance visits
- Axxicon is active in R&D and engineering what has resulted in High Temperature versions, enlarged XL/XXL, 2K test moulds, hybride/overmoulding, injection compression, foaming.

Customers appreciate Axxicon for the best quality, high knowledge and excellent service

The AIM - Axxicon ISO Manufactured - Quick Change Mould System is used world-wide in the polymer industry and was introduced by Axxicon in 1989. This flexible mould system is designed to comply exactly with the internationally accepted ISO standards as used by CAMPUS®, to produce test specimens which will be used to determine among others tensile strength, izod, charpy, impact strength, flammability, shrinkage, compression and colour matching.
